2.5f(1) Informational Report - Emergency G-11 Allocations				
1 \$100,000 Mendocino 01-Men-1 82.3	At approximately six miles north of Westport. Last February storms caused excessive erosion at the outlet of a 36-inch downdrain which resulted in a slipout, placing the highway southbound lane in imminent danger of collapse. Original cost estimate included construction of retaining wall and drainage repairs and paving. A supplemental request later extended paving, added tie rods under roadway and erosion mitigation. This supplemental request is made due to the underestimating of the retaining wall size. The retaining wall in order to rest on solid base and key into the existing slopes was expanded from the original 5'x100' to 10'x200'. 2 \$1,000,000 Solano 04-Sol-80 38.3	West of the Currey Road/First Street Overcrossing near Dixon. On June 28, 2002, a sinkhole (void) in the eastbound #2 lane damaged the concrete pavement and temporarily closed the freeway. A temporary repair was used to open the freeway to traffic but imminent threat of further closure to traffic remains until a permanent repair is conducted. A nearby 8' x 4'- x155' reinforced concrete box culvert where water flows year round is suspected of causing the sinkhole. The proposed work will involve the dewatering, inspection, and repair of the box culvert and the permanent replacement of the failed freeway concrete pavement. 3 \$702,000 San Mateo 04-SM-84 17.6	Near Woodside. A slipout at this location began as a result of the 1998 storms but was first noted in April this year. Last May, inspection revealed significant slipout enlargement that undermined the pavement and caused longitudinal pavement cracking. This project will construct secant walls at the opposite ends of this 2-lane horseshoe turn to stabilize the highway slope before the start of the rainy season. This project is eligible for Emergency Relief (ER) funds. Fire fighting bulldozers and fire-crews caused pavement damage. This project will repair all the damaged or destroyed fencing, guardrails, drainage facilities, asphalt berms and shoulder pavement.
